One of your warriors to the pointer. From the warriors' numpad 4 row first; none there: from the supply.

2 Take a token or building
Hold 1 s on a token or building: that is now your kind. Tap: one piece of your kind to the pointer. From its numpad 4 row first; none there: from its supply.

3 Prisoner
Warrior lies flat, locked, black outline. Press again: stands up.

4 Set a home row
Select pieces, *hold 2 s*: their spots become the home row of that kind. Numpad 0 sends a piece of that kind to a free spot of the row; row full: to the supply. Numpad 1 takes a warrior from the warriors' row; numpad 2 takes its chosen kind from that kind's row. Hold 4 again on a kind: its row is cleared; once more: a new row. A line in chat says which.
